

NOTE:

This ESC is only suitable for TheDIYGuy999 controllers

An MP1584 DC-DC Step Down Power Module (5V fixed voltage version) needs to be soldered to the back side.

In 3_ESC.h: (this will protect your battery from overdischarging)
 Enable RZ7886_DRIVER_MODE
 Enable BATTERY_PROTECTION
 adjust RESISTOR & DIODE_DROP values, until battery voltage reading is correct
